

Our products are made with durable acetal, PETG or laminate material and include a high grade certified sphere with one of 16 different contaminants. The material in our test pieces is food contact safe and approved by both the USDA and FDA. The test spheres are completely sealed and mechanically bonded to each product. Test pieces are color coded as noted. The sphere sizes range from 0.5 mm to 10.0mm diameter (call for larger or smaller standards). *Pricing and availability are subject to change without notice based on supplier inventory and manufacturing time.*
